PROFESSIONAL SUMMARY

Software Engineer with 1+ year of hands-on experience at Tata Consultancy Services supporting and implementing changes for business-critical applications. Experience in SQL-based data handling, application maintenance, requirements analysis, root-cause analysis, and cross-functional delivery in an Agile/Jira environment. Worked closely with business analysts and stakeholders to clarify requirements and translate business requests into application changes. Working knowledge of Java and Python, with front-end fundamentals in HTML, CSS, JavaScript, and Angular. B.Tech in Information Technology with a CGPA of 9.41/10. Fast self-learner, demonstrated through independent certifications in AWS, Java, and IT support.

TECHNICAL SKILLS

Languages: Java(fullstack-REST APIs and Microservices), Python, JavaScript

Web Technologies: HTML, CSS

Tools & Platforms: VS Code, Visual Studio, Spring Boot, SQL, Jira, Git, figma

Concepts: Requirements Gathering, Data Analysis, Root-Cause Analysis, Agile/Cross-functional Delivery, AWS cloud

Certifications: AWS Machine Learning Foundations (AWS & Coursera) · Database Management Systems (NPTEL, IIT Kharagpur) · Google IT Support Professional Certificate (Coursera) · Oracle Certified Java Programmer (Certiport)

WORK EXPERIENCE

Software Developer — Tata Consultancy Services, Chennai Apr 2024 – Apr 2025

- Worked as a developer on a content management team, implementing application changes requested by business stakeholders across 3+ modules using VS Code and Spring Boot.
- Wrote and maintained SQL queries to update, retrieve, and validate data in business-critical databases based on requirements from clients and business analysts.
- Collaborated with 4+ cross-functional teams via Jira to track tickets, prioritize deliverables, and ensure on-time implementation of requested changes.
- Attended requirement-review meetings to clarify scope with business analysts and translate business requests into concrete code-level changes.
- Identified recurring operational gaps through root-cause analysis and implemented fixes that improved system reliability.

Developer Intern — Zoho Corporation May 2022 – Jun 2022

- Gathered and analyzed user requirements to design and build a Train Ticket Booking System within a 2-month timeline.
- Mapped and optimized application workflows; performed end-to-end system testing and QA before deployment.

Independent Researcher — Self-directed Apr 2025 – Present

- Conducted structured research across government policy and economics, synthesizing large volumes of unstructured information into clear frameworks — strengthened self-directed learning relevant to fast-paced technical roles.

EDUCATION

Bachelor of Technology – Information Technology

Manakula Vinayagar Institute of Technology, Puducherry | Aug 2019 – Jul 2023 | CGPA: 9.41 / 10

ACHIEVEMENTS

- 2nd Place, National-Level Technical Symposium (Code Debugging) — recognized for analytical thinking and precision problem-solving under competitive pressure.
- Qualified preliminary round, Kaizen IIT Delhi 404! Resolved Hackathon — structured, innovative problem-solving at a national level.
- Languages: English (Fluent) · Tamil (Fluent) · Hindi (Moderate)

SOFT SKILLS

- Team Collaboration
- Fast Learner
- Time Management
